

Rechnen mit Klammern I

Lösungsvorschlag:

$$2 \cdot (12 - 10 + 20 - 9) = 2 \cdot 13 = 26$$

1.) $2 \cdot (11 - 91 + 46 - 97) = \underline{\hspace{2cm}} = \underline{\hspace{1cm}}$

2.) $2 \cdot (179 - 119 + 175 - 29) = \underline{\hspace{2cm}} = \underline{\hspace{1cm}}$

3.) $2 \cdot (79 - 21 + 162 - 94) = \underline{\hspace{2cm}} = \underline{\hspace{1cm}}$

4.) $2 \cdot (171 - 72 + 133 - 28) = \underline{\hspace{2cm}} = \underline{\hspace{1cm}}$

5.) $2 \cdot (151 - 193 + 177 - 100) = \underline{\hspace{2cm}} = \underline{\hspace{1cm}}$

6.) $2 \cdot (153 - 199 + 187 - 52) = \underline{\hspace{2cm}} = \underline{\hspace{1cm}}$

7.) $2 \cdot (40 - 139 + 116 - 57) = \underline{\hspace{2cm}} = \underline{\hspace{1cm}}$

8.) $2 \cdot (189 - 186 + 27 - 51) = \underline{\hspace{2cm}} = \underline{\hspace{1cm}}$

9.) $2 \cdot (43 - 57 + 41 - 98) = \underline{\hspace{2cm}} = \underline{\hspace{1cm}}$

10.) $2 \cdot (180 - 20 + 146 - 3) = \underline{\hspace{2cm}} = \underline{\hspace{1cm}}$

Rechnen mit Klammern I

Lösungsvorschlag:

$$2 \cdot (12 - 10 + 20 - 9) = 2 \cdot 13 = 26$$

$$1.) 2 \cdot (11 - 91 + 46 - 97) = 2 \cdot 131 = 262$$

$$2.) 2 \cdot (179 - 119 + 175 - 29) = 2 \cdot 206 = 412$$

$$3.) 2 \cdot (79 - 21 + 162 - 94) = 2 \cdot 126 = 252$$

$$4.) 2 \cdot (171 - 72 + 133 - 28) = 2 \cdot 204 = 408$$

$$5.) 2 \cdot (151 - 193 + 177 - 100) = 2 \cdot 35 = 70$$

$$6.) 2 \cdot (153 - 199 + 187 - 52) = 2 \cdot 89 = 178$$

$$7.) 2 \cdot (40 - 139 + 116 - 57) = 2 \cdot 40 = 80$$

$$8.) 2 \cdot (189 - 186 + 27 - 51) = 2 \cdot 21 = 42$$

$$9.) 2 \cdot (43 - 57 + 41 - 98) = 2 \cdot 71 = 142$$

$$10.) 2 \cdot (180 - 20 + 146 - 3) = 2 \cdot 303 = 606$$
